

## STAR-13 kit

Provide a community Internet service with your Internet connection using the low cost STAR-13 kit

- ❑ Sell the Internet service in your building or outside to a community with several methods, including voucher sales and Mobile Money payments.
- ❑ Everything you need in one kit to start providing an Internet service using your ISP connection or your Starlink antenna.
- ❑ Easy self-install and management of Internet sales, you do not depend on others.
- ❑ The GIS-K1 WiFi controller and wireless access point has the Internet user management software installed.
- ❑ Connect network and wireless devices to the GIS-K1, wired computers, indoor and outdoor wireless access points, Ethernet switched to connect more devices.
- ❑ Monitor the service for failures: get alerts.
- ❑ Protection from abuse of the Internet service; prevents unauthorized Internet access.
- ❑ No other fees, maintenance, license, software, services or contracts.
- ❑ Free support, free upgrades and free cloud service; manage the PoS from anywhere.
- ❑ Branding is easy to customize your Internet service.

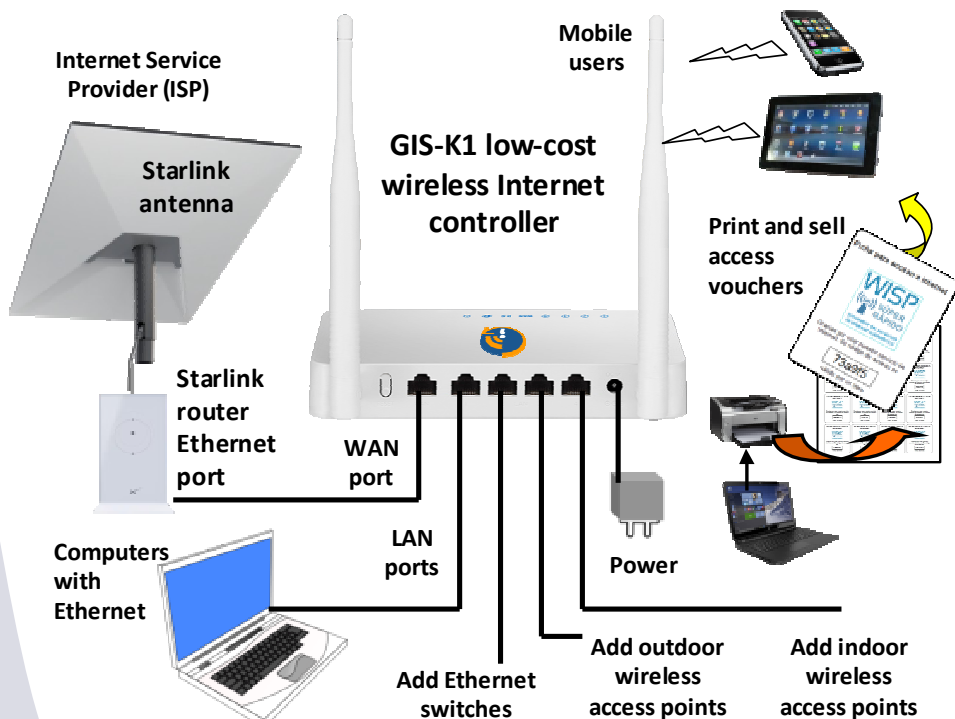

### Share your ISP or Starlink service with a community and charge for the Internet service

Many small and rural communities around the world have no access to the Internet and will benefit from the availability of an Internet service. Guest Internet controller products are used to share or sell your Internet service with members of a community. Any ISP, including Starlink, can provide the Internet service.

### The STAR-13 kit with the GIS-K1 has all the features of larger Guest Internet systems at a much lower cost

The GIS-K1 is an Internet controller that provides WiFi coverage inside a building, and can be used to connect more wireless access points to extend the range of coverage indoors and outdoors. The unique Guest Internet features maintain good Internet performance for many users while ensuring that the ISP requirements are not exceeded.

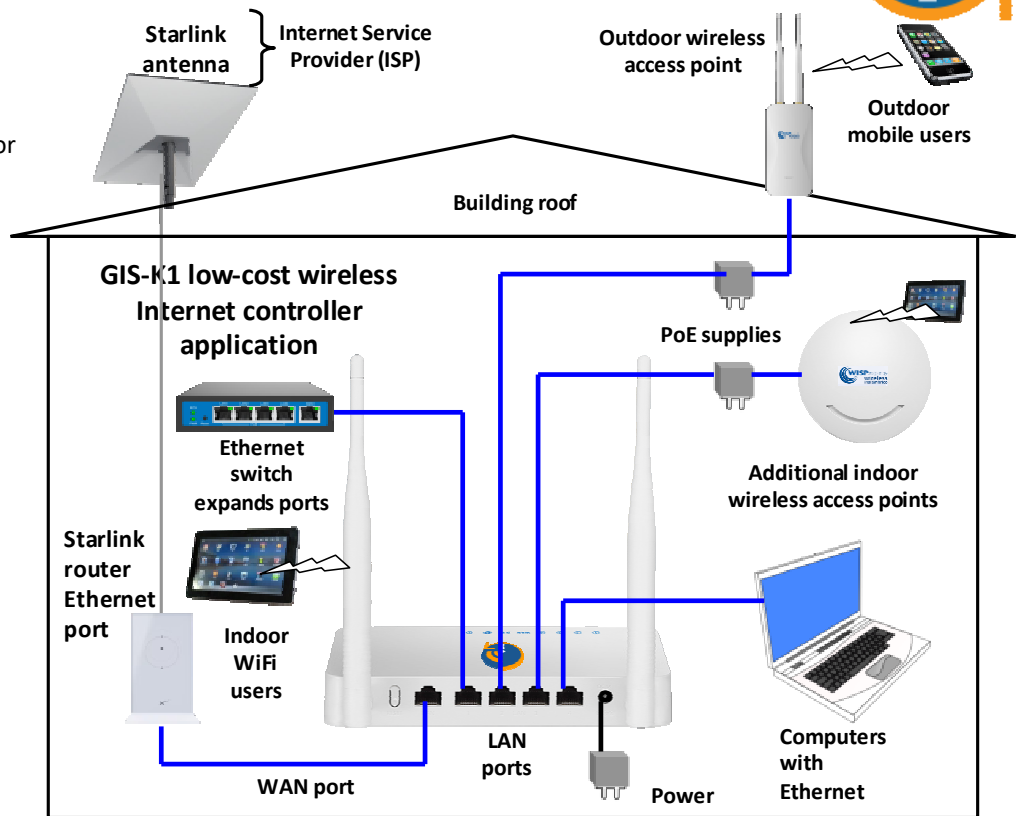

## Items included with the STAR-13 kit

- ❑ GIS-K1 Internet controller with indoor WiFi and Ethernet connections.
- ❑ Extension Ethernet cable.
- ❑ Free Cloud account to manage the service.
- ❑ Complete guide, how to connect, configure and provide your Internet service.

## The GIS-K1 is a versatile and economical WiFi building block

There is a big demand around the world to sell Internet service to the members of a community. Large networks systems are very expensive.

The GIS-K1 provides a modular low cost starting point that can be expanded as funds permit, while generating an income from Internet sales by printing and selling WiFi vouchers.

## Guest Internet features that manage the WiFi community Internet service

### Easy to install and use

Comprehensive instructions and simple products mean that you do not have to depend on others to provide the Internet service

Quick  
Start  
guide

### Control Internet use with access codes
