

Internet Hotspot Solutions for Student Accommodation

- ❑ Low cost Internet gateways that are simple to install
- ❑ Plug and play: the easy to use wizard speeds installation
- ❑ Custom login page with client branding, choose from 12 backdrops or create your own design
- ❑ Protect against lawsuits with the built-in disclaimer; the legal disclaimer can be edited
- ❑ Authenticated access uses codes that are generated and managed on the unit; no external RADIUS server is required
- ❑ A firewall protects the business network providing PCI DSS compliance
- ❑ Master bandwidth control, and individual bandwidth settings for each code
- ❑ Content filtering ensures a family friendly Internet service by blocking adult web sites
- ❑ Monitor Internet utilization through comprehensive reports
- ❑ Access code API for PoS and PMS applications
- ❑ Remote access and configuration
- ❑ Configuration backup and restore

Wireless Internet access is a 'must have' for student accommodations. However the Internet service must be carefully managed to prevent abuses. Wireless Internet is a resource that has to be shared by many students and imposing controls is the only approach to ensure fair use.

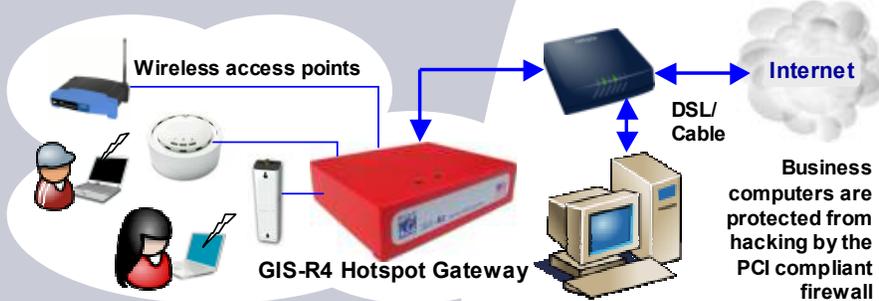

Several controls are essential for student accommodations. It is important to block peer-to-peer (P2P) file sharing software to ensure that the student accommodation management is not held responsible for copyright infringement. It is also necessary to regulate data speeds to share the resource between all students. Furthermore, depending on the student age groups, content filtering can also be applied to block adult web sites.

Solve the student bandwidth demand problem: give free Internet at a slow regulated speed and charge for high-speed access.

Use the gateway credit card billing feature to provide free regulated access and offer access without speed controls for up to ten time durations. Charge for the high-speed service using the PayPal® credit card processing service.

The login page tells students that the free Internet is a basic service and high-speed Internet can be purchased by clicking on the button.

Easy to install, no special technical skills are required

Simple setup Wizard takes less than 5 minutes

STUDENT HOUSES - GIS-R4

- Gateway for use with one or more wireless access points
- Can support up to 100 concurrent users with computers and smart-phones
- Circuits up to 20 Mb/s
- Options of credit card billing and P2P blocking

Login page generator and custom login pages

APARTMENT BUILDINGS - GIS-R6+

- Gateway for larger facilities that require multiple wireless access points
- Can support up to 200 concurrent users with laptops and smart-phones
- Circuits up to 40 Mb/s
- Options of credit card billing and P2P blocking

Simple user interface: no complicated programming is required

HALLS OF RESIDENCE - GIS-R20

- Provide a high performance Internet service with access points that cover a large area
- Supports up to 500 concurrent users with computers and smart-phones
- Dual WAN circuits up to 100 Mb/s each, with load sharing and fail-over for high reliability
- Options of credit card billing and P2P blocking

Use Guest Internet gateways with any type of wireless access point.

We manufacture a range of hotspot products that offer the exact price / performance for the smallest student apartment to the largest hall of residence. Do you have special requirements for your Internet Hotspot? Our technical support staff will be glad to help you with a solution that meets your specific requirements. We can also provide a custom login page service based on your business web site. Please call our sales staff at 1-800-213-0106 for product and price information. Please see our web site: www.guest-internet.com for product data sheets and manuals.

Guest Internet Solutions, Unit C-12, 6073 NW 167 St., Miami, FL 33015, USA. Part of the Fire4 Systems Group
